

The cause①Relation of GDP and birthrate

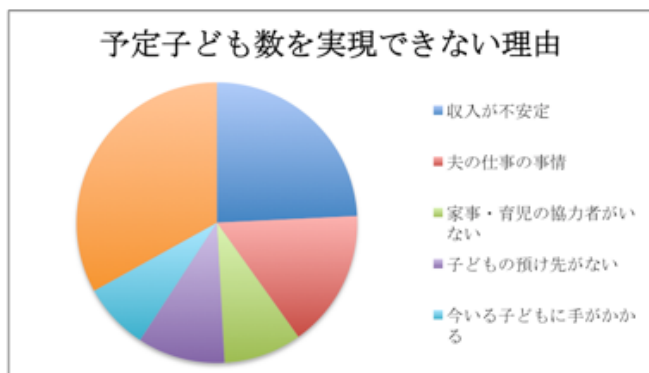

Higher GDP(gross domestic product) is, lower birthrate is.

But birthrate rises after it reached the bottom?

☞the graph goes up is that a sense of impending crisis for the declining birthrate increases like present Japan, and some measures are taken.

The cause②Reason of not having a child/not being able to have a child

Income instability : 30.5%

Circumstances of the work of husband : 20%

There are no co-workers of housework and child care : 11.3%

There is no deposit to which the children : 12.7%

Hands full with children who are now : 9.7%

the person whom a child is not born to for age and a health reason : 41.6%

☞ connected with a tendency to marry late.

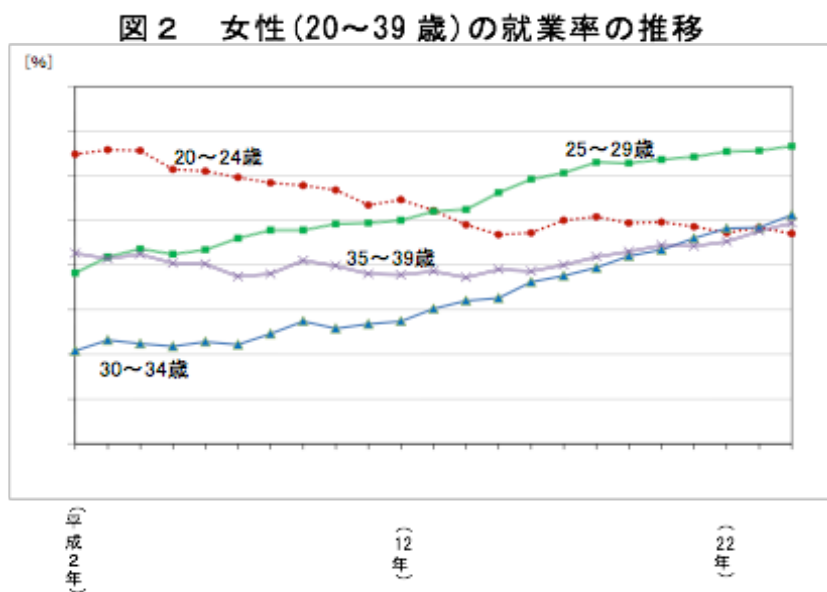

unknown : 7.8%

The cause③Women's social progress

working women increase

because the education came to be caught to the woman unlike old days

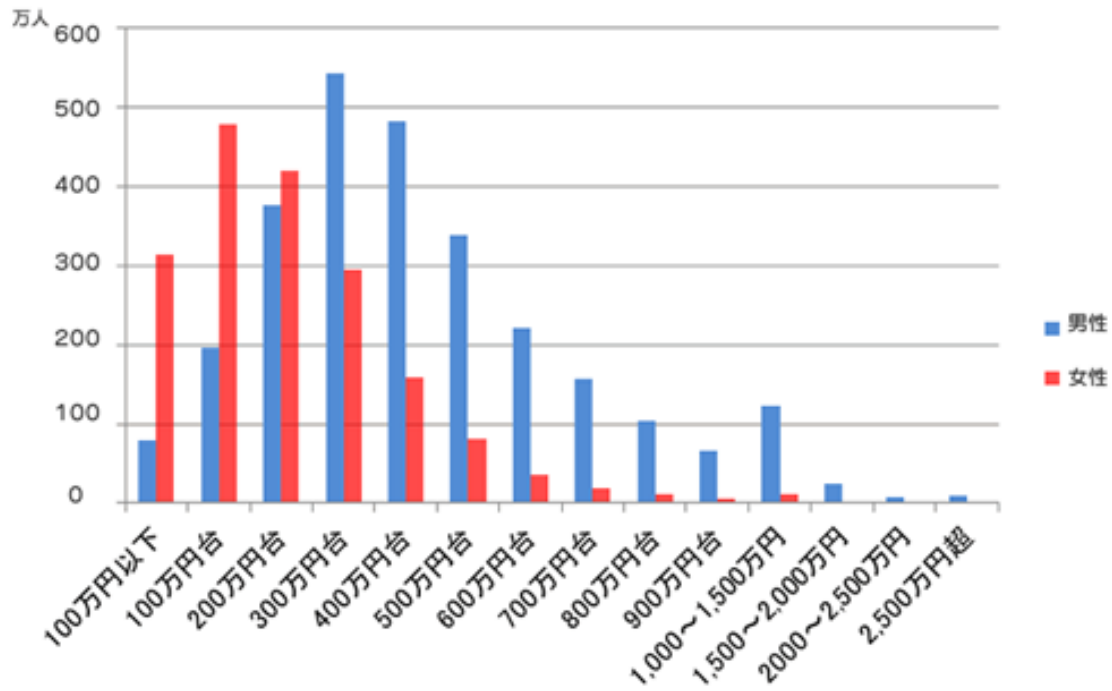

An operation rate of a woman in her 30s rises recently in this way from late 20s

The cause④Marriage

The graph according to

The man and woman according to the yearly income of a common office worker

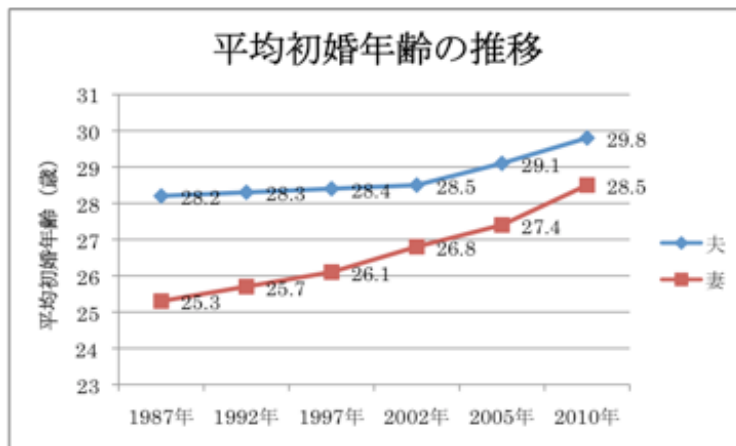

The peak of the woman annual income of one million

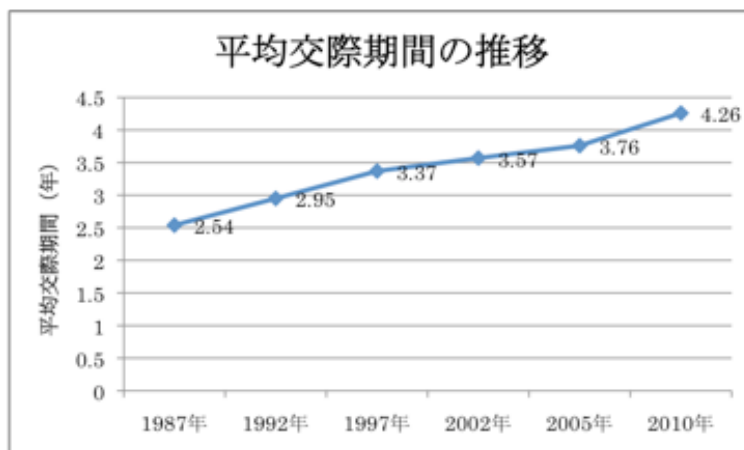

▶Incidentally,1.5 million cost of the first year of private school that's high school, 600,000 in the cheap school.

☞Current situation to say that it is difficult in income to women.

The cause⑤Tendency to marry later

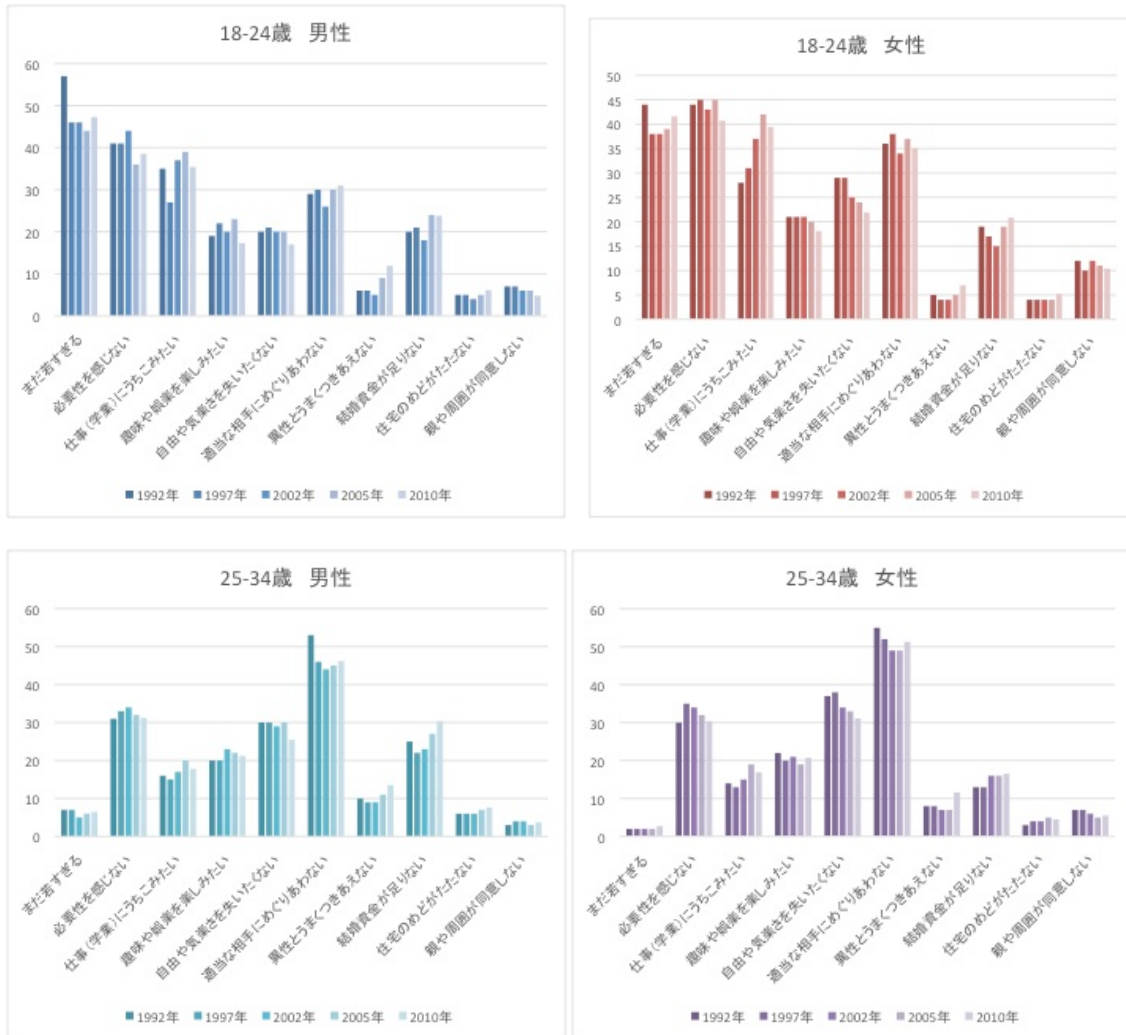

☞ mean age at first marriage is rising year by year.

☞ Age when they meet a marriage partner rises.

An association period becomes long.

The cause⑥Tendency not to marry

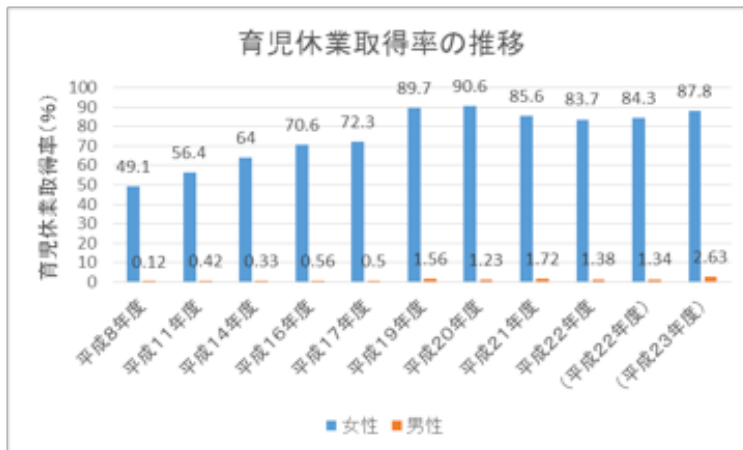

In men and women from 18 years old to 24 years old, "Still too young" and "Not to feel the need" account for most as reasons.

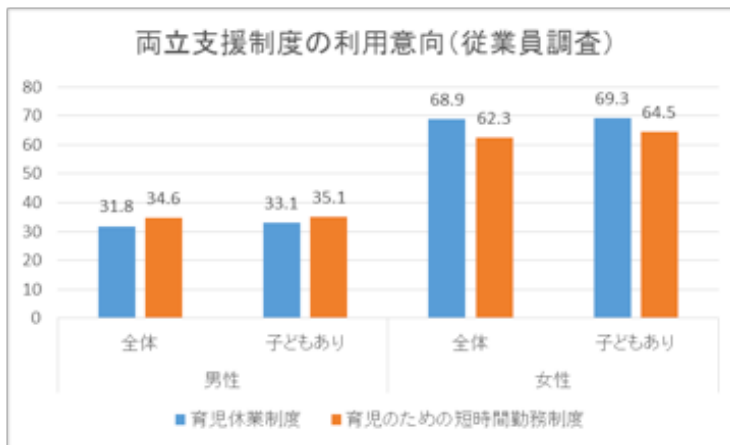

"Not to rotate to a suitable partner" increase when age rises.

☞ people who cannot do it even if they want to marry increase.

The cause⑦Parental leave and paternity harassment

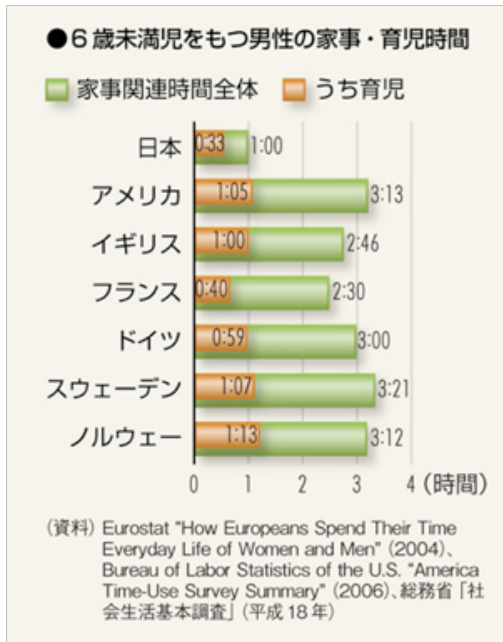

Almost none of the men take the parental leave.

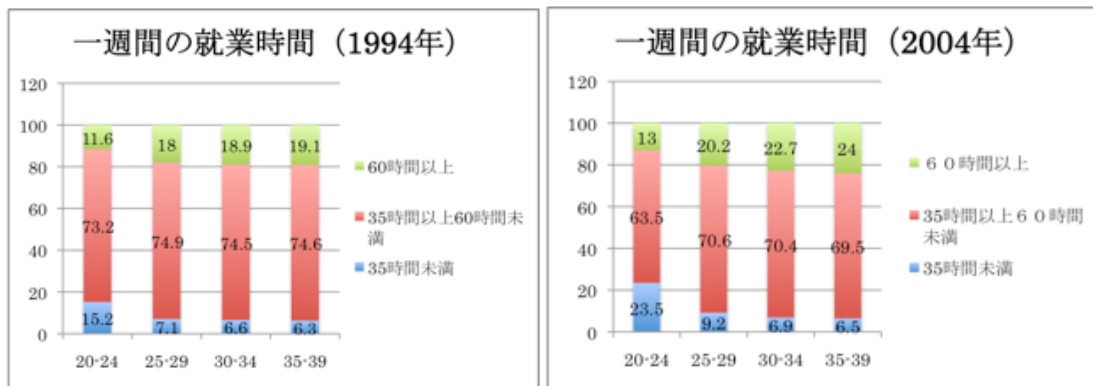

The person who cannot really do for it to see this even if he want to spare time for child care.

The cause⑧Relation of men's child care

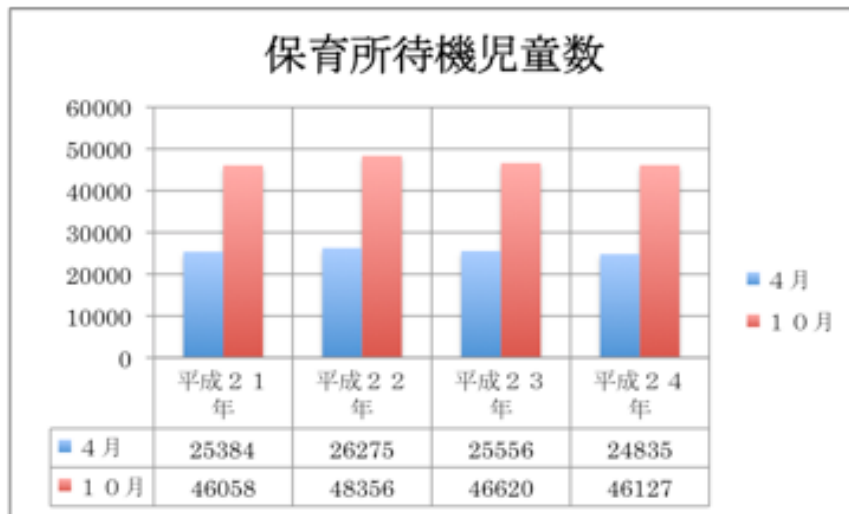

A Japanese man has little time to take care of children compared with another country.

For the reason of child care participation time of the Japanese man being short.

☞ they are little time to look after their baby.

The cause⑨Lack of the nursery school

Waiting-list children awaiting entrance increase in nursery schools.

Japanese government increases nursery schools and is going to reduce a waiting-list child.
