

Worksheet

No.4 Urbanization

★First let's learn the contents of the page!

- Urbanization progressed due to popularization of home appliances and automobiles.
- Building style and heat island phenomenon is serious in the center of Tokyo.
- Wind flow changes according to skyscraper, wind blowing down is called building wind.
- The temperature rises only in the central part of Tokyo and other places.
- The temperature in Tokyo has risen by 3.7°C in 100 years.
- Vehicle vibration, noise, exhaust gas, etc. are also called "traffic pollution".

Let's think about it.

I think that companies and countries have found that they are taking measures against urbanization. So, is there anything we can do?

On the next page, there is a free writing column.

★Free writing column
