## No.5 Future of Japan

★First let's learn the contents of the page!

- The goal is to achieve "recycling-oriented society", "low carbon society" and "nature symbiotic society" integrally with the premise of "a society where safety is secured".
- A recycling-based society is to reduce the amount of natural resources used and to use things repeatedly.
- A low-carbon society refers to a society that reduces carbon dioxide emissions.
- Nature symbiosis type society refers to a society that coexists with nature and can receive nature's blessings.
- Companies contribute to environmental problems improvement by "green purchasing" and others.

**Let's think about it.**

Countries and businesses are actively working on improving environmental problems. What can we do?

On the next page, there is a free writing column.

## ★Free writing column
