

Worksheet

No.7 Ozone layer depletion

★First let's learn the contents of the page!

- The ozone layer covers the earth, protecting us from ultraviolet rays.
- Ultraviolet rays trigger illness and food crisis.
- Ozone layer has been destroyed mainly by Freons.
- Freon has been subject to regulation, especially in developed countries.
- Recovery of fluorocarbons is being promoted by the CFC emission control method.

Let's think about it.

Recovery of old refrigerants has not ended in developed countries nor in emerging countries. What can we do to promote collection?

On the next page, there is a free writing column.

★Free writing column

★Let's review

- (1) The ozone layer has the effect of protecting us from .
- (2) The main cause of ozone depletion is .
- (3) Freon was also known as a .
- (4) For preventing CFCs, law was enacted in 2001 in Japan.

Answer

(1) ultraviolet rays (2) Freon (3) dream chemical (4) Freon emission control
