## No.8 Pollution

**★First let's learn the contents of the page!**

- Typical seven pollution is "air pollution, water pollution, soil pollution, noise, vibration, odor, ground subsidence", which is stipulated by the Basic Environment Law.
- In China, fine particulate matter (PM 2.5) became a problem for a while. There are still more PM2.5 than in Japan.
- The background of the problem of air pollution in China is the delay of environmental regulations.

**Let's think about it.**

The pollution problem is also a big problem in Japan.

So, what kind of efforts are being done in our surroundings?

On the next page, there is a free writing column.

## ★Free writing column

## ★Let's review
