

Worksheet

No.9 Energy problem

★First let's learn the contents of the page!

- The demand for energy in recent years has increased considerably due to the economic development of emerging countries.
- Crude oil is one of the limited resources.
- In recent years, the decline in crude oil prices is prominent.
- Because Saudi Arabia and the United Arab Emirates are core industries, declines in crude oil prices will lead to a reduction in the income of the country.
- Nuclear power generation tends to increase in developed countries as well as in emerging countries, because cost is low.

Let's think about it.

How can we use energy in the future?

Let's think about what we should do to improve the current situation of energy problems.

On the next page, there is a free writing column.

★Free writing column
