

1. Total time the foreign student talked : 1 minute 11seconds / 10 minutes
2. Time it took to start talking : 1 minute 18 seconds (From foreign student)
3. Topic: Contents of the conversation taken between foreign student and Japanese students during the experiment (10 minutes)

- About the country the foreign student is from
- About sports
- Whether they have come to Japan before
- About Japan

4. Answers to the questionnaire for the foreign students

- A) How was it?

It was a good experiment. I like to meet with people from different countries.

- B) Could you talk with Japanese students smoothly?

Yes, I could understand everything they said.

- C) Why do you think so?

Because they knew English well.

- D) Impressions for Japanese students

They were all kind to me.

- E) What do you think is something you could do to enjoy this experiment more?

I think they could have talked to me more.

- F) Things you thought was the obstacle when communicating with Japanese students

There were a lot of silence. (Introvert)

- G) What do you think is important when talking with people who speak different language as you?

Communication.

5. Answers to the questionnaire for Japanese students

- A) How was it?

• The advice was sent in the miss of the experiment and it finished when I tried to speak so it felt short.

• It was hard to start talking at first because everyone was silent. I was hoping everybody to talk but only me and another student talked so I was disappointed.

• I thought it was going to go smoothly but it didn't maybe because we did it on Zoom.

- I couldn't start talking because we talked through the screen.

6. Observation

Everybody was quiet at first but they became fran when they started self-introduction. The foreign student was showing response when Japanese students were talking. Two of the Japanese students didn't talk and didn't even self-introduced. One of the students said "This is awkward." but it was disappointing that she didn't provide any topics.
